

MMRL Media Metadata Research Lab

MMRL

an art research collective working at the intersection of data visualization, digital art, and cultural analytics. We develop quantitative and qualitative methods for measuring and representing diversity in media.

MMRL +2020 Abigail De Kosnik, Benjamin De Kosnik, Veronica Jackson, Matthew Jamison, Jaclyn Zhou,

+ 2021 Summer Researchers Caitlin Chan, Kellyann Yee, Sam Kolasa

We work in public.

Film, books, serial television, streaming television, albums, music, and other media objects examined in the following pages are tagged with medata in this data repository:

https://github.com/mmrl-me/mmrl-metadata

Individual media object files:

https://github.com/mmrl-me/mmrl-metadata/tree/main/json

The tagging schema, and all details from experiments with applying tags to specific media objects can be viewed in the MMRL data repository, which is licensed as CCBYSA and can be re-used by others.

Please contact us if curious or willing to contribute.

"Ethnicity" refers to a mix of both racial and ethnic categories. Every character needs at least one supertag. Tag ethnicities for both the character and the actor.

Tag Values

Supertags:
black
white
latinx
middle eastern/north african (mena)
asian pacific
indigenous
multi
unknown
ambiguous
Secondary tags:
specific ethnicity (e.g. "chinese")
playing (e.g. "white playing asian pacific")

Notes

Use "multi" supertag instead of "mixed," "multi-racial," "mixed-race," etc.

"Unknown" supertag applies largely to non-human characters or animation.

Human characters in live-action texts are more likely to be tagged as "ambiguous" given that race is largely determined visually.

Description

"Nationality" refers to a character or actor's country of citizenship, primary residence, or origin.

Every character needs at least one supertag. Tag nationalities for both the character and the actor.

Tag Values

Supertags:

- tag the ISO-3 country code
- indicate mixed nationality with a comma and space (e.g. "jpn, hun" for a character who is a citizen of Japan and Hungary)
- nonextant nation
- unknown
- world x

Secondary tags:

- ___ playing ___ (e.g. "GBR playing USA")
- specific instances of world x (e.g. "Alderaan" or
- "Vulcan") or nonextant nation (e.g. "Ancient Rome")

Notes

"Unknown" supertag refers to situations in which the nationality/origin/citizenship of a character is not specified.

"World x" supertag is used primarily for science fiction and fantasy works in which present-day earth geopolitics (and hence nations as we understand them) do not apply.

"Nonextant nation" is used for historical regions that do not cleanly map out onto modern day nations
